

E-Learning with Students

February 10, 2023

Department of Physics organized a participative e-learning session with student centric problem solving approach. The explanation about working of X-ray diffractometer for material characterization was given to M.Sc.-II Physics students on 10-02-2023. There were almost 40 students. Dr. Deepshikha and Prof Jaswinder Kaur gave them demonstration of X-ray diffractometer for materials characterization. The students had learned the basic concepts of topic and also learned the method. Students had enjoyed the session with very curiosity.
