

Quiz Competition

An in-class quiz competition was organized for the students of B.A. III on 11th April 2017 by the Department of Economics. It was done with a view in mind that it is critical in today's world to enhance the children's awareness of his/her surroundings. In this increasingly competitive world, it is very important to enhance the skills and knowledge of the students, especially when students spend too much time on gadgets but are still unaware of what's happening in the real world. It is necessary to let children explore the knowledge outside of their curriculum. This can be fun and can create curiosity among students to learn more and more so that they develop their intellect for the good prospects in the future. The topics which were covered included CENSUS 2011, business and environment, Stock Exchange. It was participated with full fervor and excitement by the students. Every successful event depends upon the coordination and coordination depends upon the proper planning and the photo shows the sign of victory after completion of this in class competition. Dr. Shaveta Kaushal was the local coordinator of this programme.
