

Industrial visit of students to National Fertilizers Limited, Nangal

The Department of Chemistry, Sri Guru Teg Bahadur Khalsa College, Sri Anandpur Sahib, Punjab, organized a one day **Industrial Trip** to the **National Fertilizers Limited, Nangal, Punjab**, for graduation and post-graduation students on February 26, 2019. The students were taken to the production plant to provide a deep insight into the various processes undertaken for production followed by distribution of Urea. The functioning of the Montedison Total Recycle process of Urea production with description of each of the unit including the synthesis unit, separation unit, recovery section, prilling section, storage section and packaging unit was explained to students. The students were taken up to some height of the 104 meters long prilling tower for better understanding of the solidification process of urea. The storage and the packaging area were also visited by the students.
