

3rd Position in University
Working Model, “Anti-Sleep Alarm”

March 05, 2025

On March 5th 2025, three students of B.Sc. Physics Hons attended the Science Day celebration held at Sri Guru Granth Sahib World University. The event was designed to commemorate Science Day with various competitions attracting participants from different colleges. Our students, Khaleeq Ahmad, Rahul and Kartik,

participated in the working model competition. The working model "Anti-Sleep Alarm" was based on the theme of road safety. This innovative device is designed to be integrated into automobiles to help prevent accidents caused by driver fatigue. The competition was lively, with many talented students from various colleges showcasing their impressive projects. Our talented students earned the 3rd position in the working model competition. This thrilling achievement filled the students with pride and

satisfaction. Moreover, this proved to be an incredible learning opportunity where interactions with other participants made them to gain insights into the creative processes and provided them the ideas behind other participants working models. Dr. Pritpal Singh, the Vice-Chancellor of the university handed over the prizes. Overall, participation by the Physics department students and winning in the university level competition during the Science Day celebrations was an enriching experience filled with learning, creativity and inspiration.
